Custom Antibody Services

Let us make your Drug of Abuse antibodies for you with our high-quality custom antibody services.

The **DISCOVERY-LINE Services** are our part of our monoclonal antibody program and are designed to be a cost-effective means of developing a high-quality antibody. Or, if you prefer a polyclonal antibody, our **EXPRESS-LINE Services** use an accelerated, 50-day protocol, while the **CLASSIC-LINE Services** use a standard, 98-day immunization schedule. In addition, the **HARMONY-LINE Services** combine peptide synthesis with polyclonal antibody production, providing both services to you for a discounted, package price.

All of Lampire's Custom Antibody Services include an evaluation of your antigen, which includes a prediction of immunogenicity, plus we provide you with the opportunity to review the immunization protocol before your project begins. For more information on these services, please use the contact information below.
