High-Tech Vivarium Ready for your outsourcing needs!

LAMPIRE's newly expanded high-tech vivarium and its staff are available for your lab animal projects. The newly expanded capacity and enhanced facilities can accommodate drug metabolism and pharmacokinetic (DM/PK) studies, teratogenicity studies, small- and large-scale hybridoma projects, and much more. With a cGMP compliant Quality System, projects are completed on-time, with outstanding quality, and in conformance with your requirements, specifications, and standards.

With our close proximity to the NJ/Philadelphia area, our facilities are available with dedicated labs and animal husbandry support for your research needs. Let our highly trained staff handle your projects or take advantage of working on your project at our facility alongside our trained staff. Our staff includes AALAS certified technicians, toxicologists and veterinarians working under cGMP guidelines. Along with our technical support staff, this creates an unmatched team of specialists striving to make your project a success.

Let our principal investigators and project managers work with you to design an appropriate animal use protocol for your project needs. Or if you have a protocol you would like to use, Lampire's IACUC will review it for use on your project at our facility.

Features:

- AAALAC accredited and USDA licensed
- Environmentally controlled and monitored housing
- 100% HEPA-filtered once-through fresh air, "green" designed and built for LEEDS certification
- Species specific animal rooms with dedicated support labs
- "Clean-Dirty" corridor system
- Specialized clean rooms with laminar-flow hoods for aseptic procedures are available
- Back-up generators and alarmed monitoring systems
- Monitoring of closed circuit surveillance system on and off premises
- High speed data ports throughout facility

Species Available:

Mice – Rats – Hamsters – Guinea Pigs – Rabbits – Fish

Multiple strains, knockouts, and transgenics available. Please inquire.

Services Offered:

- Pharmacokinetic/Drug Metabolism Studies
- Teratogenicity Studies (ZEC & rWEC)
- Monoclonal Antibody Development & Production
- Octet RED® Antibody Characterization
- Cell Banking & Cryopreservation
- Tissue Culture Services

Accreditations

AAALAC, EC No. 1774/2002, NIH-OLAW, USDA. The facility exceeds the NIH Animal Care & Use Guidelines, 8th edition.

Getting started is easy. Just call 215-795-2838, email us at lampire@lampire.com, or contact your local LAMPIRE representative, to discuss your project and set up an appointment with our technical staff.
