

## CELL CULTURE BAG

# Culture

Designed to support the growth of many cell types including human stem cells, hybridomas, CHO, HEK293, and Jurkats. The bags can be readily adapted for batch-, perfusion-, and culture- expansion protocols for both suspension- and anchorage-dependent cells.

# Centrifuge

Robust and can readily withstand 1,000xg centrifugation for easy, one-step cell harvesting.

Compatible with cell cryostorage applications, including -196°C. Cells may be stored, recovered and expanded within the same original container.

Custom made bags are available.
