Meet Our Monoclonal Team!

Bill Bucher

David Chen

Bill Bucher is our Technical Director with 40+ years of experience generating monoclonal antibodies for numerous applications, as well as antigen design and custom immunization protocols to fit your needs! David Chen and Cassie Leggour are the scientists who develop your custom monoclonal antibodies, with experience in tissue culture, screening assays, and cloning selection, to ensure the successful production of your antibodies. Alexis Boucher is the Monoclonal Project Manager, responsible for developing custom scopes of work and ensuring consistent client communication throughout your entire project.

Schedule a call today and start your Monoclonal Project!
