

# IVD REAGENTS

**Quality | High Purity | Low Cross-Reactivity | Competitive Pricing | Research & Bulk Packaging**

- **High purity**
- **Low cross-reactivity**
- **Customizable**
- **Wide range of species**
- **Designated donor animals**
- **Lot-to-lot consistency**
- **Custom conjugates & fragments**
- **Manufactured in the USA**
- **Consistent quality standards**

The global pandemic over COVID-19 has raised awareness regarding testing and the availability of the key reagents and raw materials for those tests. In addition to testing for COVID-19, serological tests are critical assays for many health issues, including solid organ transplantation screening, crossmatching, disease diagnosis, monitoring and management. Immunoassays are some of the most powerful and sensitive tests available, based on highly specific binding between antibodies and antigens, enabling detection of analytes. LAMPIRE IVD reagents are used around the world in serological tests, rapid test lateral flow, flow cytometry and ELISA. Check out these newly released IVD reagents from LAMPIRE!

## **7455900, Goat anti Human Alpha 2 Macroglobulin**

**Applications:** Cirrhosis, Nephrotic Syndrome, Diabetes, Pancreatitis, Fibrinolysis, Liver Disease

**Package Size:** 100 mL, 500 mL, 1 Liter

## **7455490 Goat anti Human Albumin**

**Applications:** Liver Disease, Kidney Disease

## **7455230 Goat anti CKMM**

**Applications:** Cardiac Disease, Muscle & Nerve Diseases

## **7455460 Goat anti Human Hemoglobin**

**Applications:** Blood Diseases, Anemia

## **7455470 Goat anti Human Transferrin**

**Applications:** Iron Deficiency, Anemia, Hemochromatosis

**THE  
LAMPIRE  
ADVANTAGE!**

- ✓ Experienced technical partner with over 43 years servicing the life science industry
- ✓ Knowledgeable and responsive sales and customer service staff
- ✓ Competitive pricing, from research sized to bulk quantities
- ✓ Customizable products available to meet your specifications
