IgGs and Secondary Antibodies

LAMPIRE has an extensive line of IgGs and Secondary Antibodies designed for use in lateral-flow, ELISA, and other immunoassays. Targets include Bovine, Donkey, Goat, Human, Mouse, Rabbit, Rat and Sheep. Lot sizes are large enough to support both assay development and production, without qualifying a new lot. Whether you are located in the United States or overseas, LAMPIRE has you covered. Our experienced shipping staff will help you with every step of the process. Call us today to find out why LAMPIRE has been a trusted supplier for over 40 years.
