

# Oligonucleotide Antibody Generation

- **10+ Years of Experience with this Immunogen Class**
- **Custom Affinity Purification Protocols**
- **Both Monoclonal & Polyclonal Projects**

Anti-sense therapies are a growing class of oligonucleotide-based therapeutics designed to treat a variety of diseases. Anti-oligonucleotide antibodies are frequently used to support drug development and monitor anti-sense drug levels. LAMPIRE actively supports these challenging programs by producing anti-oligonucleotide antibodies using LAMPIRE custom protocols.

## Lampire Custom Characterization Strategies

- Oligo conjugation to a variety of carrier molecules
- Custom oligo immunization protocols
- Titer monitoring via ELISA
- Strict adherence to immunization strategies
- High immunogenic response in animals
- High sensitivity and specificity
- Specific to downstream use
- Affinity purification using biotinylated material with Avidin resin coupling

## Applications

- Supports anti-sense RNA research and development
- Positive control reagents in ADA
- Drug development applications

- ✓ **Experienced** technical partner with over 44 years servicing the life science industry
- ✓ **Knowledgeable** and responsive sales / customer service staff
- ✓ **Competitive** pricing, from research sized to bulk quantities
- ✓ **Customizable** products available to meet your specifications
